SERIES LISTING

Series 1: Working files and specifications. - 3 m.

This series contains any or all of the following: folded plans and blueprints, preliminary drawings, estimates, specifications, tender and contractor documents, calculations of space, heat, electricity, etc., accounts, and time sheets for each project. Following the practice of Mr. Toombs these have been arranged under the following categories: commercial, residential, church, and public buildings. Voluminous specifications are housed separately.

Title based on contents of series

The listing for this series has been combined with that of Series 2.

A PROJECT LISTING FOLLOWS THE SERIES 2 DESCRIPTION

Series 2: Rolled plans. - 12 m.

This series consists of original or blueprint plans for individual projects. They may include any or all of the following plans: site, floor, elevations, sections, details, structural steel, electrical, and mechanical. Arrangement is by the same categories as Series 1: commercial, residential, churches and public buildings.

Title based on contents of series

The listing for this series has been combined with that of Series 1.

PROJECT FILES

@ Indicates Blanchard material

**** Indicates Harris material**

Please note that the box numbers are for the working files which are the first listing in each project. Shelf locations are given for SPECIFICATIONS and for ROLLED PLANS, entries for which follow the working files. Not all project files have all three formats. If specifications are not voluminous, they may simply be part of the working files.
